Google

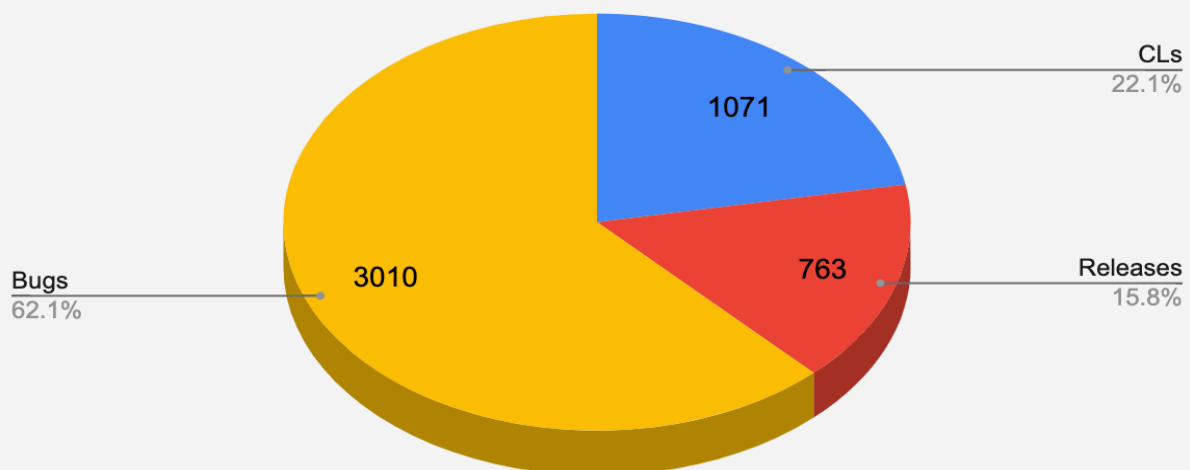

2009 to present

Have had a long stint at Google across various PAs viz Geo, Dasher, MDM to name a few. Following is the graphical representation of the impact during this run, where I wore multiple hats.

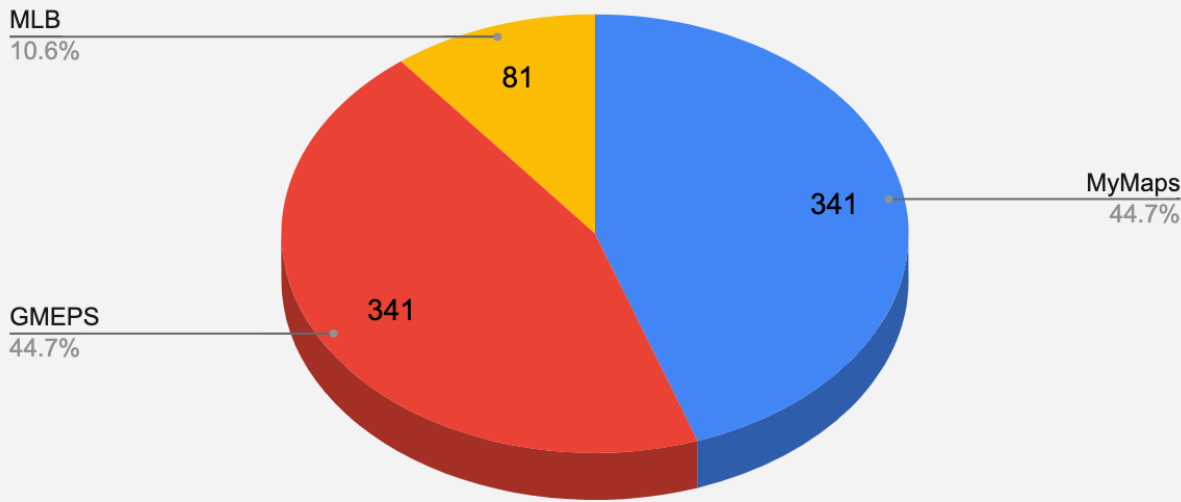

Role/ Contributions:

- Completely responsible for the Production release of code changes and bug fixes
- Completely responsible for end-to-end testing and release cycles
- Suggested multiple feature requests in early stages of product development for improvisation
- Simultaneously owned multiple projects and wore multiple hats
- Managed other vendors onboard besides deploying code changes to Production
- Managed all the inventories like 100+ devices, overall, across various PAs

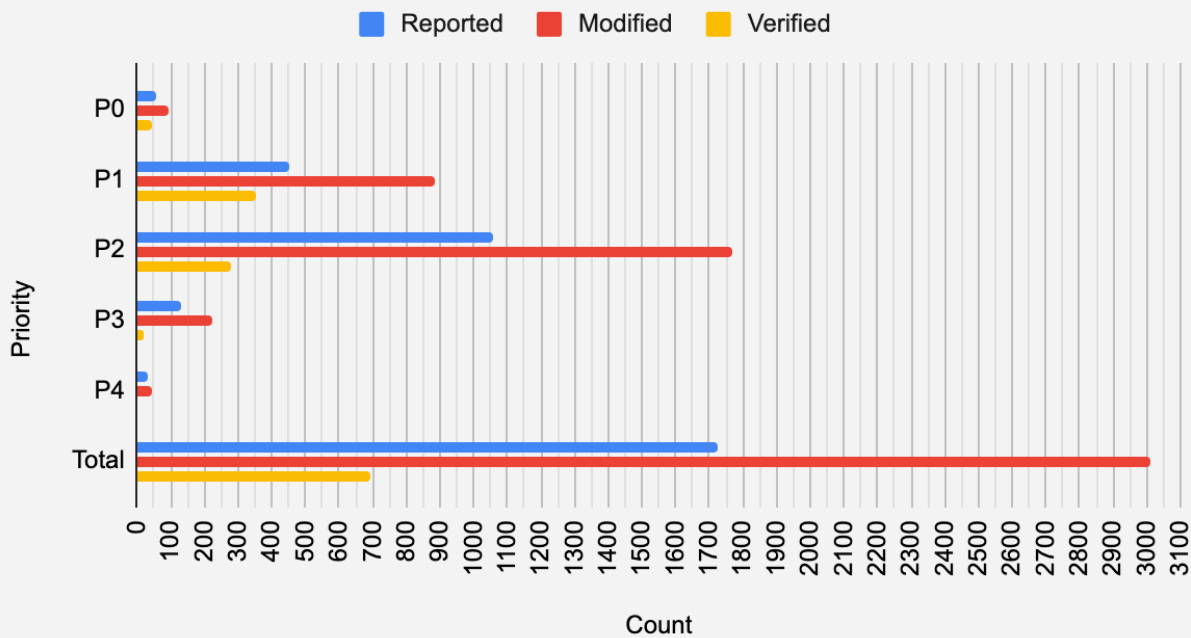

Impact Count (Area Wise)

Release Count (Project Wise)

Bug Count (Priority Wise)

Geo (Google)

2014 to present

Have had a long stint at Geo owning multiple projects , mostly simultaneously. This included the complete stack of most projects, viz MyMaps, GMEPS, Candyshop, MLB, MMS, to name a few.

Role/ Contributions:

- Completely responsible for the production release of code changes and bug fixes, right from the Staging environment
- Management of Rapid Releases and Dashboards
- Managing one off release cycles for important feature rollouts
- Cross functional teams and managing with other PAs in case of dependent blockers

My Maps (Google)

2014 to present

The My Maps team enables users to create custom maps for personal use or sharing.

Role/ Contributions:

- Owned the testing processes for the My Maps frontend and backends
- Owned the release processes for the My Maps frontend and backends
- Owned the Admin tool (used for Blacklisting)
- Owned the Help admin tool (to edit Help articles for My Maps)

Candyshop [Deprecated] (Google)

2014 to 2016

The Candyshop team is responsible for Maps Gallery indexing/serving and Related Maps indexing/serving.

Role/ contributions:

- Owned the release and testing processes
- Owned the Help admin tool (to edit Help articles for My Maps)

Dasher (Google)

2009 to 2013

The Dasher-Migration team enables users to come onboard for G-Suite products through a seamless migration.

Role/ Contributions:

- Owned the testing processes for all Dasher-Migration tools
- Owned the release cycles for all Dasher-Migration tools
- Managed 3 vendors within premise
- Managed an inventory of 50+ testing devices

MDM (Google)

2009 to 2013

The MDM-Android and MDM-iOS teams enabled device management and administration for EDU and non-EDU users.

Role/ Contributions:

- Owned the testing processes for MDM-Android and MDM-iOS
- Owned the release cycles for all MDM-Android and MDM-iOS
- Managed 3 vendors within premise
- Managed an inventory of 50+ testing devices

Besides Google

2007 to 2009

Have worked in various capacities, with other Fortune 500 clients.

Highlights:

- Was engaged with clients like IBM, India and AT&T, Texas during my stint prior to Google
- Excelled at delivering timely results in a high pressure work environment which needed juggling multiple jobs simultaneously
- Optimized my team's performance by closely understanding the team's dynamics to bring the quarterly and annual targets timely to fruition
